**WORK EXPERIENCE**

Present

**Lawyer with the Benedetto Costantino – Professional Association Law Firm in Padua**

• Name and address of the employer

Studio legale Costantino, P.zza A. De Gasperi 47, Padova, Italy.

• Type of firm

Law firm active in the civil, corporate, international and european law

• Main responsibilities

In the Benedetto Costantino Law Firm, where I am currently a permanent collaborator, I am concerned with lease rights (both commercial and residential), successions, bankruptcy, commercial law, intellectual property, labor law with specific reference to the relationship between commercial agents and principals.

Among the most significant experience acquired within the Costantino Law Firm, I particularly emphasize, in the judicial context, my assistance in important disputes in the areas of 1) real estate contracts, 2) contractual failures regarding the implementation of renewal energy plants and experimental prototypes for the so-called augmented reality (for civilian and military usage), 3) IP rights in the pharmaceutical and mechanical sectors, 4) liability management actions, 5) rental agreement laws for residential and industrial cases, 6) unlawful competition of former members and directors, and 7) failure laws.

In court, given the strong international vocation of my Law Firm, I was concerned with the drafting of opinions, in English, in favor of foreign companies aiming at establishing branches in Italy. Still in court, I was involved with the redaction of real estate contracts, both in Italian and English.

I have prepared legal advice in English, regarding the Italian regulations pertinent to the application of European directives for medical devices, in favor of foreign companies interested in expanding their markets in Italy.

During the last year, I have represented the Benedetto Costantino Law Firm at international conferences in Paris and Ghent related to the most recent updates on legislation and jurisprudence of the European Union.

In this regard, starting from the half of 2016 I began working with different corporate customers as facilitator and consultant for the alignment of their structure to the General Data Protection Regulation. In particular I have dealt with:

- the study of the regulation 679/2016;
- the study of the interpretative guidelines issued, ahead of the date of entry into force of the regulation cited above, by the English, French and Spanish authorities overseeing data protection, given the delay of the pertinent Italian authority;
- the analysis of the organizational charts and of the level of access to personal data depending on role, within the structure of the companies;
- the analysis of the flows of data, input and output, the adopted security measures in close collaboration with information technology resources within companies, in order to understand their appropriateness as provided by article 32 of the GDPR ;
- the drafting of the agreements with the data processors (as provided by article 28 of the GDPR) on behalf of the data controllers;
- the redaction of the appointments of personnel authorized in dealing with personal data, according to the principles of "minimization" and "proportionality" of access level, and according to the corporate role of the employees;
- the analysis of the requirements to be satisfied in connection with video-surveillance devices for the control of work places;
- the redaction of the records of processing activities, as provided article 30 of GDPR;
- carrying out the data protection impact assessment, as provided by art. 35 of EU regulation 679/2016.

Starting from the beginning of 2018, I am the external consultant for the Pontifical Gregorian University, in relation to the above mentioned activities and I have been appointed as Data Protection Officer of the Pontifical Gregorian University, according to article 37 of GDPR.

As DPO I was involved in training the administrative personnel, in addition to redacting opinions on specific issues, in connection with the peculiar juridical status of the University, which is managed and controlled by the Apostolic See in Vatican State (which is a public international law subject, outside the EU).

I also dealt with writing opinions, related to the transfer of data toward countries outside the EU, in relation to which the European Commission has not yet adopted an adequacy decision, according to article 45 of the GDPR. At this regard, I have had to manage the relations between the University and the diplomatic security services and the embassies of third countries outside the EU, about the requests of personal data of former students, coming from countries outside EU.

I have deeply studied the juridical issues related to the data-flows toward the United States of America, as required by the Privacy Shield, and related to the personal data flows inside the global network of some academic institutions.

In general, giving my legal assistance to the Pontifical Gregorian University, I have gained a very deep expertise in managing a complete process of compliance to the GDPR, in an international environment, characterized by a complex internal organization, and facing all the most problematic juridical

issues raised by EU Regulation n. 679/2016 and related:  
a) to the peculiar juridical status of my client;  
b) to the fact that Pontifical Gregorian University is part of a broader international network, and, finally;  
c) to the personal data flows towards entities outside the UE, and, in particular, towards Asia and Africa.

**EDUCATION AND TRAINING**  
**2018**

Candidate the with the CUOA Foundation (Master Executive in Crisis and Change Management)

**2014**

Lawyer registered with the Order of Attorneys of Padua  
Course in euro-planning (official AICRE) at VIU (Venice International University).

**ABILITIES AND RELATIONAL SKILLS**

The complexity of issues I encountered within the Law Firms in which I have been employed has required a continuous collaboration with specialists in legal contexts different from those of my professional concentration. These interactions provided important opportunities for personal growth and exchange in a variety of technical-judicial areas developed by each member of the Law Firms.

It should be pointed out that the nature of the issues entrusted to me required the need for team work involving experts in various sectors beyond the legal environment (in particular, chemists, medical doctors, mechanical and environmental engineers). This allowed me to become familiar with the language and the approaches used in diverse professional contexts, especially when preparing defense strategies for trials.

My professional development was enriched also by the constant collaboration with my parents in the management of our family's agritourism business. Being involved in this effort has strengthened and solidified my interpersonal skills with clients and customers, given the necessity of dealing with a wide range of people often from other nations (Germany, United Kingdom, France, United States, United Arab Emirates, Iraq, Turkey, Russia, and Libya)

I have lived, worked and studied for a period of six months in Ireland for the purpose of improving my knowledge of the English language.

As youth educator, in Catholics in Action, I had the opportunity to practice patience and communication skills.

**ABILITIES AND ORGANIZATIONAL SKILLS**

The management of legal processes under the supervision of seasoned attorneys at law as Benedetto Costantino has allowed me to develop great legal skills while meeting pressing deadlines.

In the context of organization abilities in the judicial field, I should mention the management of the relationship with clients of the Law Firms, the identification and preparation of the documentation necessary for the redaction of legal defenses and acts as it pertains to their evaluation, the skills in reporting and summarizing the technical accounts of the judicial consultants and defense lawyers.

It should be clarified, that while keeping up with the demands of my family's agritourism business throughout middle school, high school and college, I fine-tuned my organizational skills needed for combining scholarly pursuits and work efforts, with the goal of completing my basic education before 24 years of age.

My participation in the organization of cultural events as the secretary of the Treviso section of the Union of Italian Catholic Jurists from 2005 and 2008 had also an important impact in my development.

**ABILITIES AND TECHNICAL SKILLS**

On the technical plane I would like to showcase the following:

- In depth knowledge of the civil and criminal discipline;
- the ability to prepare judicial acts in civil, criminal and administrative contexts;

- the ability to take care of writing procurement contracts for high amount of funding, especially in the environmental, energetic and real estate sectors;
- the management complex negotiations both the pre-contractual and transactional phases;
- the management of the judicial proceedings in all contexts (civil, criminal, administrative) at first, second and third instance;
- in deep knowledge of the English language, written and spoken.

**ABILITIES AND ARTISTIC SKILLS**

I participated in different national and regional writing competitions during High School resulting in victories and honorable mentions. In 2001 my essay entitled "Young people and life" won a contest proposed by the Right to Life Movement in Treviso.

**DRIVING LICENSE**

License B. Car owner.
